Director's Message

At *FORZA MEDI INDIA*, we believe that mobility is the freedom, independence, and empowerment for every individual. Since our establishment we have been changing the lives of persons with disabilities by providing them with mobility solutions that offer both comfort and reliability. We are committed to providing mobility for all through our cutting-edge mobility solutions.

FORZA MEDI INDIA as emerged as a beacon of excellence in the mobility solution, offering a comprehensive range of wheelchairs to cater to any disability needs. Our products are aggressively tested in our advanced manufacturing and testing facility, which ensures that mobility does not stop for anyone.

We truly appreciate your trust in *FORZA MEDI INDIA* and are honored to be a part of your mobility journey.

Warm regards,

Ashish Jain

Managing Director

FORZA MEDI INDIA PVT. LTD.

About Us

At FORZA MEDI INDIA, we are not just the manufacturers; we are architects of mobility solutions, tailored precisely to your needs. Our journey began in 2000 with a simple yet profound mission: to empower persons with disabilities & elderly through high-quality, reliable, and cost-effective mobility solutions. Over the years, we have taken immense pride in our association with industry leaders who have guided us in developing and designing our exceptional range of products.

We have state-of-the-art manufacturing facility, strategically located in IMT Manesar, Gurgaon, Haryana. These facilities are equipped with cutting-edge technology, including wheel manufacturing, upholstery production, plastic injection molding, aluminum rim, hand rim manufacturing, powder coating, anodizing, heat treatment, PU molding, and a fully equipped CNC and VMC machine shop.

Quality Tests

DOUBLE DRUM TEST (ISO 7176-8)

Loaded for 100-140 Kg

The double drum is a set of rollers that the wheelchair rides on for an extended period of time. There are slats on the drums that simulate pavement irregularities.

Tested for Endurance- 2,00,000 cycles

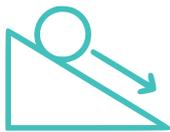

DROP TEST (ISO 7176-8)

Loaded for 125 Kg

Tested for endurance- the drop simulates the wheelchair descending a curb.

6,666 cycles from 50 +/- 5 mm

STATIC STABILITY TEST (ISO 7176-1 & 3)

Determines stability on a slope in forward, rearward and side facing positions. The chair is placed on a platform that can be inclined. The ramp is gradually raised until the chair becomes unstable. The angle at which instability occurs is recorded. The test is performed with the chair facing uphill, downhill and sideways

IGNITABILITY TEST (BS EN 1021-2)

This European Standard specifies a test method to assess the ignitability of material combinations, such as covers and fillings used in upholstered seating when subjected to a small flame as an ignition source.

INTEGRATED STATIC TEST (ISO 7176-8)

Armrest and footrest of the wheelchair are subjected to loads from pneumatic cylinders and tested for resistance to downward and upward forces.

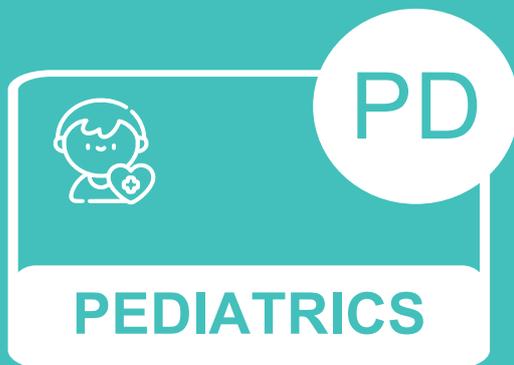

Tipping Lever and Hand grip tested for resistance.

PRODUCT RANGE

We offer wide variety of products to match every need of our customers.

CLEMATIS PRO

NEURO

About this WheelChair

The Rea Clematis Pro wheelchair is a game-changer, loaded with features and is designed to elevate the experiences of users and caregivers alike. Specifically crafted for individuals needing tilt-in-space support, it's a pivotal addition to the market-leading Rea Passive range. With a 25-degree seat tilt and 30-degree backrest recline, effortless repositioning is assured. Offering exceptional postural support and comfort, this wheelchair is equipped with a variety of accessories to ensure stability during extended use. The patented Rea design and DSS (Dual Stability System) technology by Invacare International provide enhanced safety and stability during tilting or reclining movements.
